

MARCOS LOPEZ

Scrum Master

I'm a Scrum Master with more than six years of experience leading international teams in Information Technology.

Agile for me, symbolizes the work we put in and the work we are going to put in, trying to be worthy of people's time, being a part of their day, trying to make something worth remembering!

WORK EXPERIENCE

AGILE COACH — Bosch Service Solutions

Vigo, GA

Feb 2018 – Present

After all the work we've done as a team, we've started to share the way we work with the rest of the teams around the world. This position is mainly focused on building an Agile Culture at the Company and spreading the best practices with all the teams. I still have the previous position for implementations to support the team as a Scrum Master | Coach Development and IT teams in Agile principles in both ways: on site and remotely | Mentor the most mature teams | Educate colleagues in Agile with the less mature teams | Develop the Agile adoption strategy | Create material for trainings and further workshops | Define Agile events for the teams based on Agile principles and stakeholders expectations | Analyze and design coordination events among different teams using Scrum of Scrums | Install, configure and maintain a Project Management Tool System with JIRA Software and a multi-project tool | Maintain and feed an internal Agile community.

REGIONAL SCRUM MASTER — Bosch Service Solutions

Vigo, GA

Dec 2016 – Present

The position is global and people involved on projects are from different countries, that is why I work to keep it agile | Scrum Master of teams delivering solutions for the Americas Region (USA, Brazil, Costa Rica, Spain and Portugal) in the Head Office located in Spain | Scrum events facilitator: Sprint Planning (with poker planning), Backlog Grooming, Daily Standups, Sprint Reviews and Retrospectives | Coordination among other teams using Scrum of Scrums | Define internal product portfolio features with the whole team and provide support as a product manager | Consultant for the Americas Region in Software projects, such as: CRMs, BI, Telephony Platforms, Ticketing Tools, Integrations, Automations, Web Pages, etc. | Manage internal reporting such as time dedication, releases delivered, sprints planning, burndown charts, projects classification, etc. | Create useful material for Sales Teams such as automatic pricing tools with standard department solutions, quotations generators, internal web pages to consult portfolio products features, etc. | Define an UX strategy for some of the portfolio products | Application Manager for Project Management Tools such as JIRA Software.

IT PROJECT MANAGER — Bosch Service Solutions

Vigo, GA

Aug 2015 – Dec 2016

Since the very first moment, I realized that the way to manage IT and Software must to be different than managing other fields. Then I started learning by myself, reading articles, consulting webpages, watching webinars, etc. This is what I like to call my "agile transformation", and I began putting all those good practices on a daily basis.

IT PROJECT MANAGER JUNIOR — Bosch Service Solutions

Vigo, GA

Feb 2014 – Aug 2015

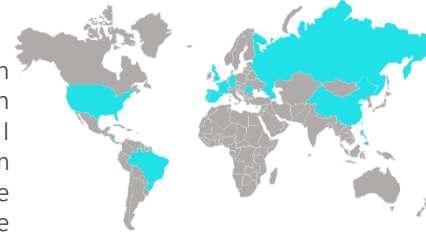

After having some experience working on Companies where I have used skills and knowledge developed on my degree, I started thinking about putting all those skills on the ground and at the same time doing something bigger, something that I really like and something that has been more than a hobby all this time: Software and IT.

 Scrum Manager Association

ABOUT ME

My personal goal has always been the daily work to keep improving myself. Every day, I try to learn and to find new challenges. Sometimes it's not easy to make them real. Then I push harder to make them possible, because I really like to get things done, not just pretty ideas.

I want to have an international and global point of view. Meeting new people, learning new cultures, exploring new places, saying "hello" or "cheers" in other languages are some of the things I enjoy. I also like to listen at good music, play tennis and hang out with friends.
